# Donation Guidelines

At Arkansas Children's, we not only make sick and injured kids better today, we also care for the entire family, with such services as social work, child life, education and pastoral care. Many of these needs are met through the generosity of donors like you. Your gifts of new toys, handmade items and other new gifts go a long way toward supporting families and brightening a hospital stay for a patient. Because the health and safety of our patients is our #1 concern, we've developed several wish lists that meet our infection control standards.

## Please Remember:

- We are unable to allow donors to deliver gifts directly to patients due to issues regarding patient confidentiality, infection control and security.
- Due to infection control guidelines, **all donated items must be new and free from odors that might violate infection control policies.** We are unable to accept items that are religious in nature.
- Due to safety regulations, we are unable to accept any items that are gift-wrapped.
- Due to our no-solicitation policy, we are unable to accept any items labeled with identifying donor information.
- Because many of our patients are on special diet requirements, we are not able to accept food for our patients. However, Volunteer Engagement will accept donations of pre-packaged food for family waiting areas.

Make your donation count! All items donated are inspected prior to distribution to our patients. Items not meeting our guidelines are redirected to another charity or discarded.

# THANK YOU for championing children!
